Data Visualization with Power BI and Tableau

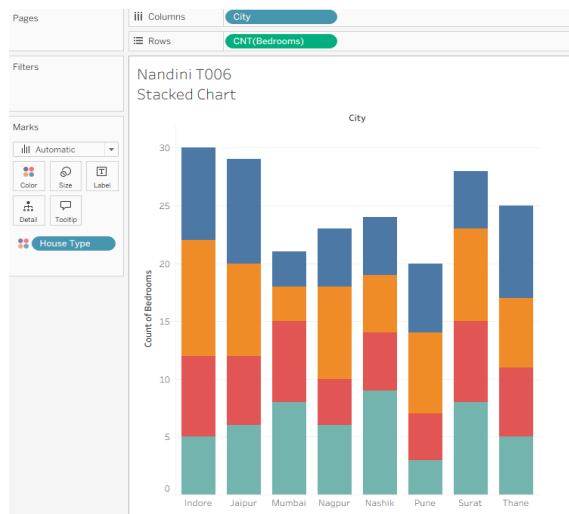

Practical – III

Roll No.: T006	Name:Nandini Chaudhary
Class: TYIT	Batch:01
Date of Assignment: 14-08-2026	Date/Time of Submission:14-08-2026

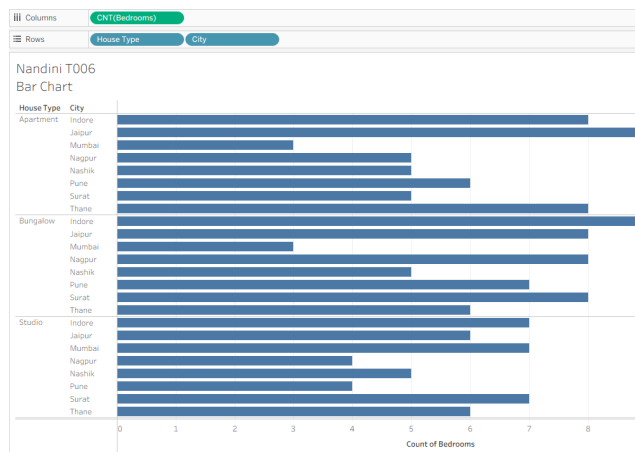

Creating Advanced Visualizations in Tableau

A) Create stacked and grouped bar charts for comparison

Stacked Chart:-

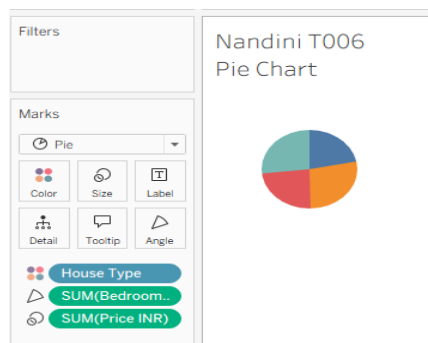

Bar Chart:-

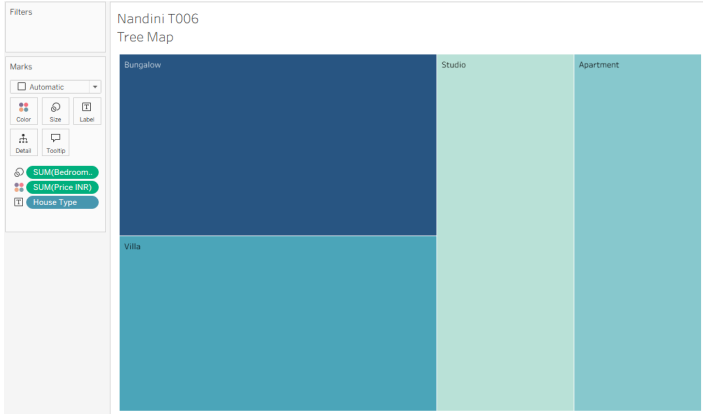

B) Build treemaps and pie charts for part-to-whole analysis

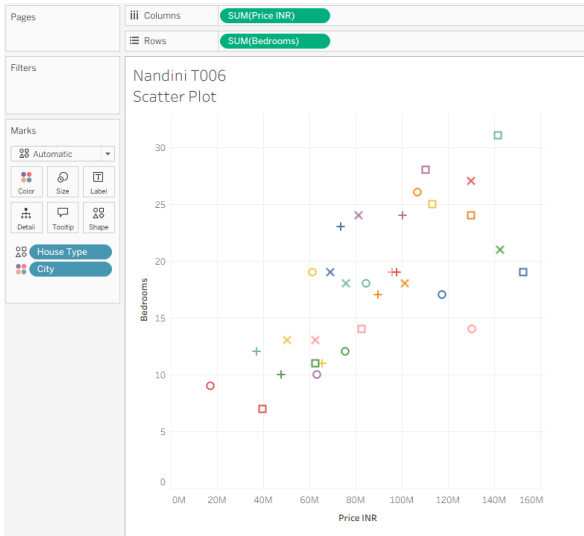

Pie Chart:-

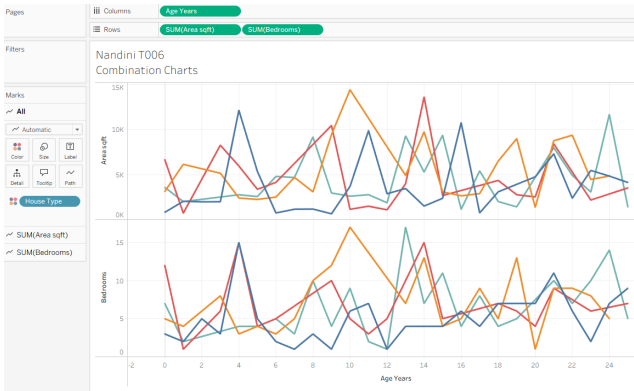

Tree Map:-

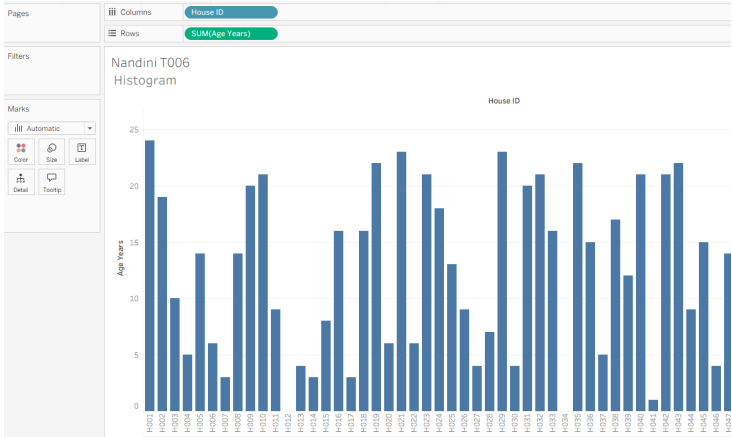

C) Design scatter plots to identify relationships

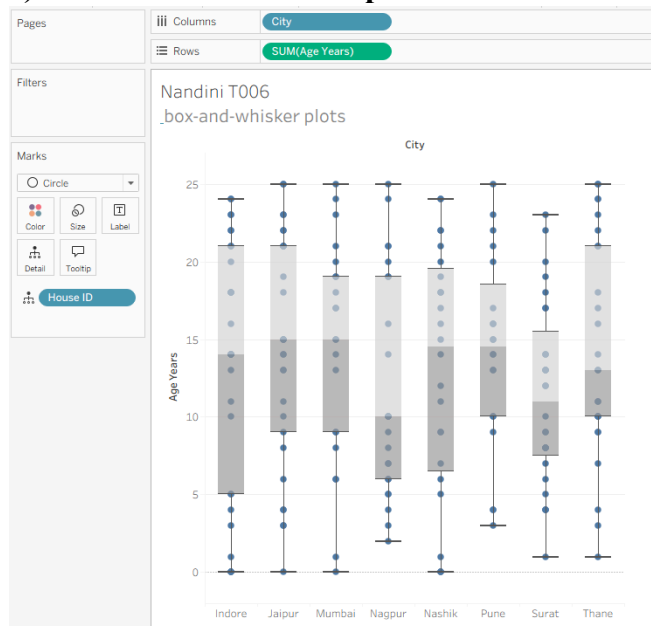

D) Create dual-axis and combination charts

E) Develop histograms for distribution analysis

F) Build box-and-whisker plots

G) Use Gantt charts and advanced date visualizations

Overall Conclusion:-

The practical demonstrates how advanced Tableau visualizations can be used to compare data, analyze relationships, understand distributions, and identify trends. Charts such as bar charts, treemaps, scatter plots, dual-axis charts, histograms, box plots, and Gantt charts make complex data easier to understand and support better decision-making.

Key Insights:-

- **Bar charts:** Compare sales or categories easily.
- **Treemaps & pie charts:** Show part-to-whole contributions.
- **Scatter plots:** Identify relationships between variables like Sales and Profit.
- **Dual-axis/combination charts:** Compare measures with different scales.
- **Histograms & box plots:** Understand data distribution and detect unusual values.
- **Gantt charts:** Show task duration and timelines.
- **Date visualizations:** Help identify yearly, quarterly, and monthly trends.
